# COMPANY

# OUR GOAL IS SIMPLE: SUPPLY THE BEST-FITTING, HIGHEST PERFORMING AND MOST-DURABLE BINDINGS IN THE BUSINESS.

## State of the Union

There's no telling where life will take us, but it's reassuring to know we can always count on getting outside and doing what we love: Ripping down a frozen slope on a laminated piece of wood, while enjoying the company of friends, family and Mother Nature.

While navigating through the challenges of the past couple winter seasons, the core mission of keeping things simple, functional and stronger has never rang more true here at Union. The foundation we have built over the past 19 years is unbreakable.

The goals at Union are simple: Continue to be a leader in clean energy, engage in social responsibility at a local level, and constantly develop cutting-edge technology and manufacturing techniques. With one full production year under our belt, THE BOX has proven its investment return, setting new standards on quality and timely delivery. In a nutshell, we have increased production efficiency, contributed to our community, drastically reduced energy consumption in production, and passed these overall values to our customers. Challenges make us stronger. As you will see in the following pages, Union is more than just a product to enhance your sliding through the snow: it's a philosophy and way of life.

# The Union Difference

## Focus

Free from the distraction of developing a bazillion different products for snowboarding, camping, and whatever else... Union focuses solely on building better bindings for all types of riding, at all ability levels, for each price offering.

## Quality

A binding is only as good as the sum of it's parts. Here at Union Binding Company we use the highest grade materials available on every single binding that we produce. Wherever you see the "U" logo, you can have the confidence that no sacrifices have been made. We guarantee it.

## Durability

From professional snowboarders like Travis Rice to Lift Operators riding 100+ days a season - The Union brand name is synonymous with durability and longevity. More snowboarders around the world trust Union over any other binding brand on the market.

## Compatibility

Union offers a broad array of binding models to suit riders of all ability levels, riding styles and price points. Union bindings are also compatible with all major snowboard and snowboard boot brands, making Union the go-to binding for riders around the globe.

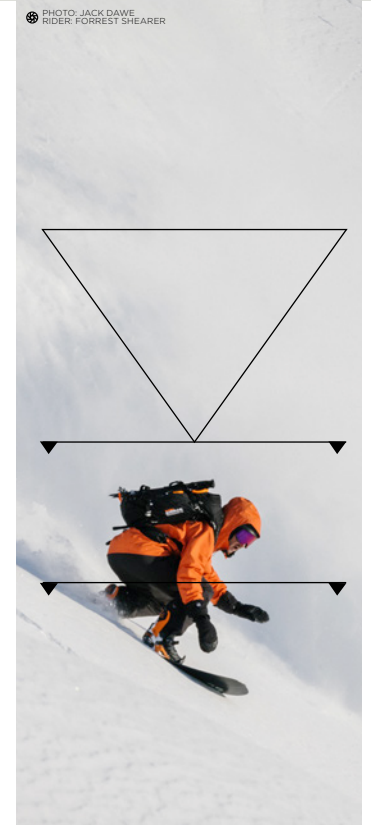

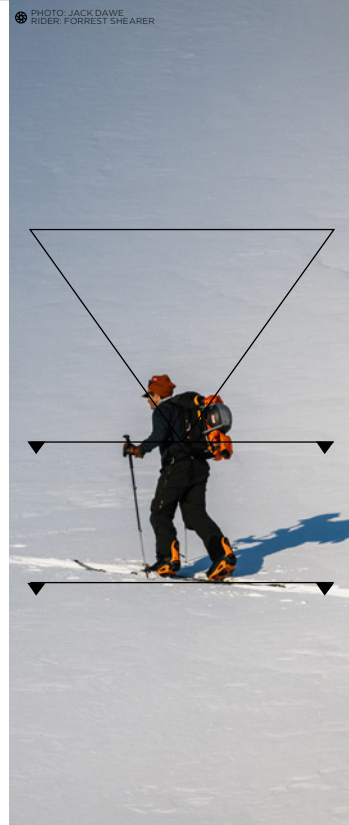

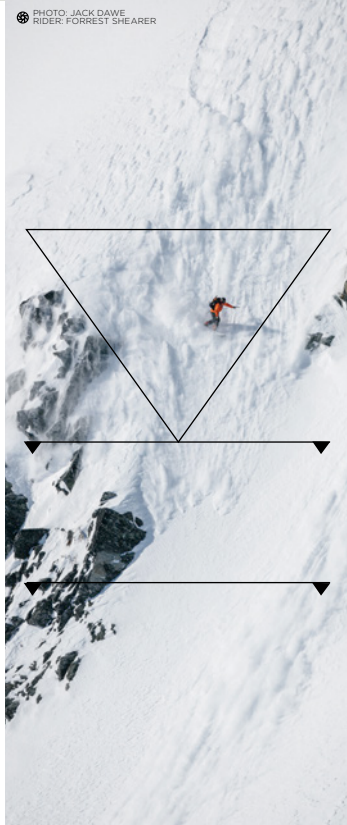

## Adjustability

Bindings are the most important piece of snowboarding equipment you own. That being said, it's crucial that they are set up properly to ensure optimal fit and performance. All Union bindings come with adjustable heelcups, ankle straps and toe straps, so you can dial in the perfect fit.

## Warranty

Every pair of Union Bindings is injected with the highest quality Duraflex Nylon. The result is strength, safety and security. It also means having the confidence of a lifetime warranty on all baseplates and heel cups. So, if you break, or even crack your baseplate or heelcup during riding, we'll replace it for life. Guaranteed.

**RIDERS**

From the streets, to the Olympics, to the top of Alaska's biggest spines. Union's global team of over 100 professional athletes is a testament to the quality and performance of our product. There's a reason why more professional snowboarders trust Union Binding Company than any other brand on the market today.

**TESTERS**

Union's binding testing team is comprised of professional athletes, engineers, industry experts, sales reps, retailers, and snowboarders from around the globe. Having a wide range of testers, conditions and feedback allows us to build the best bindings possible.

**CREW**

Our dedicated in-house staff handle everything from design and engineering, all the way to binding production, assembly and logistics. Union Binding Company is the only major binding manufacturer with zero outsourcing.

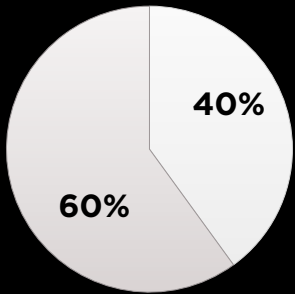

**YOU**

Union would not be what it is today without YOU. Thank you to every snowboarder, every shop, and everyone that has ever supported Union along this 19 year journey. You are all part of the Union team.

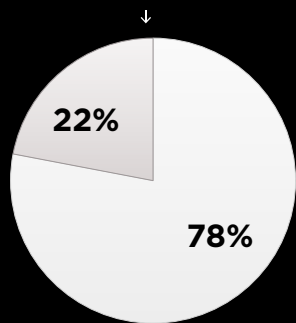

# Union Packaging

We've been in the manufacturing game a long time and are no strangers to the impact it places on the environment. From our bindings to our operations, no part of the Union process is without intention. In 2022/23 reduction in our packaging size alone led to dramatic increases in efficiency and lower waste numbers for the company.

↑  
CURRENT MASTER BOX SIZE DISTRIBUTION  
(60% Large Boxes / 40% Small Boxes)

NEW MASTER BOX SIZE DISTRIBUTION  
(22% Large Boxes / 78% Small Boxes)

# Packaging Efficiency

2021 and Earlier Shipping Container Efficiency

2022 and Later Shipping Container Efficiency.  
Smaller Boxes mean more bindings per container.

## Reduce

- Reduce overall cardboard consumption / costs
- Reduce size of our binding box and master carton by 5%
- Use new smaller binding boxes and master cartons for 80% of the collection
- Increase the amount of bindings per container by 20%

## Reuse

- Utilize reusable storage bags and thermoformed cases for spare parts and accessories packaging.

## Sustainability

- FSC Certified Mixed Packaging Materials
- Reduced painting and pigments used on packaging.

# 23/24 Line Segments

With 6 different product categories to choose from, Union makes it easy to find exactly what you're looking for. From resort riding, to the streets, to deep in the backcountry, Union has you covered.

## All-Mountain

Instant edge-to-edge response and stable board connection. The Union All-Mountain Series of bindings deliver a performance advantage in all conditions and terrain. Camber Disks and unyielding bombproof design will be found here.

## Freestyle

The Union Freestyle Series bindings are designed for riders looking for the ultimate in freedom, comfort and that "loose truck" feel. Minimal binding-to-board contact is a concept pioneered by Union from day one, and the Freestyle Series showcases the benefits.

## Youth

Smaller and softer versions of what the pros ride, the Youth Series retain key fundamentals that put Union on the map. They are also the most adjustable kid's bindings on the market.

## Rental

Bombproof construction, durable materials, easy adjustability, and backed by the confidence of the Union brand-name. Union rental bindings are the new choice to get all levels of riders started off on the right foot.

## Expedition

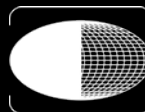

The Union Expedition series has one goal in mind - Enjoy the ride down. Whether you're a seasoned backcountry vet, out for your first day on a splitboard, or looking to explore new terrain with the Rover, Union has you covered from start to finish.

## Accessories

Binding replacement parts, soft-goods, stickers and more Genuine Union accessories will keep you dialed on and off the hill.

# THE NEW FORCE

Superior performance, innovative design, and precision manufacturing.

**\*A Binding 20 Years in the Making**

# FORCE 1

# FORCE 2

# FORCE 3

## GEN. 01

Originally launched in 2004. The first generation of Union Force quickly became a team, industry and shop favorite. Often imitated, never duplicated. The Force was the binding that put Union on the map.

YEARS ACTIVE → 2003 - 2012  
CHARACTER → Strong  
Bombproof  
Dependable

## GEN. 02

The most trusted binding in snowboarding for close to a decade. The second generation of Union Force was put through the ringer by Union pros like Dan Brisse, Scott Stevens and Danny Kass.

YEARS ACTIVE → 2013 - 2022  
CHARACTER → Trusted  
Durable  
Lightweight

## GEN. 03

The next generation of Force has arrived. Welcome to the future of Union design and engineering. The third generation of Force was built to push the best riders on earth to new heights.

YEARS ACTIVE → 2023 - XXXX  
CHARACTER → Timeless  
Technical  
Innovative

# TECHNOLOGY BREAKDOWN

→ Molecular Ankle Strap Padding

Maximum cushion = Maximum comfort. Union's Molecular Ankle Strap padding helps to minimize foot and ankle fatigue by reducing pressure points. Form fits perfectly to any boot on the market.

Featured On: Force, Trilogy

ExoFrame 6.0 Ankle Strap

Padded comfort meets response. The all-new ExoFrame 6.0 Ankle Strap features our new Molecular Ankle Strap Padding all the way over the edge of the plastic ExoFrame strap body. This new design helps to minimize foot and ankle fatigue by reducing pressure points.

Featured On: Force, Trilogy

Molecular Bushing System

Union's all new Molecular Bushing Suspension System acts as an additional layer of dampening and shock absorption between you and your snowboard.

Featured On: Force, Trilogy

Non-Stick HP EVA

The next evolution of Union's non-stick EVA technology. Non-Stick Hot Press EVA creates a closed cell finish that's 100% waterproof. Gone are the days of snow and ice build up on your bindings.

Featured On: Force, Trilogy

→ S9 Duraflex ST Baseplate

Built with a purpose. The Stage 9 Duraflex ST Baseplate offers Union's highest levels of strength and energy transmission to date. Backed by Union's lifetime warranty guarantee.

Featured On: Force, Trilogy

S19 Duraflex ST Highback

Layered highback construction allows riders to achieve stronger edge to edge response while still maintaining torsional flexibility for a comfortable ride.

Featured On: Force, Trilogy

ST9 Baseplate Gasket

The final layer of the of the Stage 9 base. The baseplate Gasket holds the molecular bushing in place, and adds another layer of dampening and vibration cancelling to the new Force and Trilogy.

Featured On: Force, Trilogy

TS 5.0 Toe Strap

Our newest and most comfortable toe strap to date. The TS 5.0 Toe Strap easily shapes to any snowboard boot and offers maximum grip from all angles.

Featured On: Force, Trilogy

### 20 YEARS OF THE FORCE VIDEO

A binding 20 years in the making. This winter we'll be creating a short documentary looking at the history of Union through the lens of the Force binding. Three generations of Union employees, professional athletes and bombproof design. Get your pen and paper ready, it's time to take notes on how the #1 binding in snowboarding was born.

### KEY ADVERTISING CAMPAIGN

The New Force will be Union's biggest marketing push since 'Stronger - The Union Team Movie'. Much like the Ultra launch from this season, we will have a dedicated 1 month campaign to highlight the Force from all angles. This will include - social media, e-mail, web, print and in-store activations all focused on the new Force.

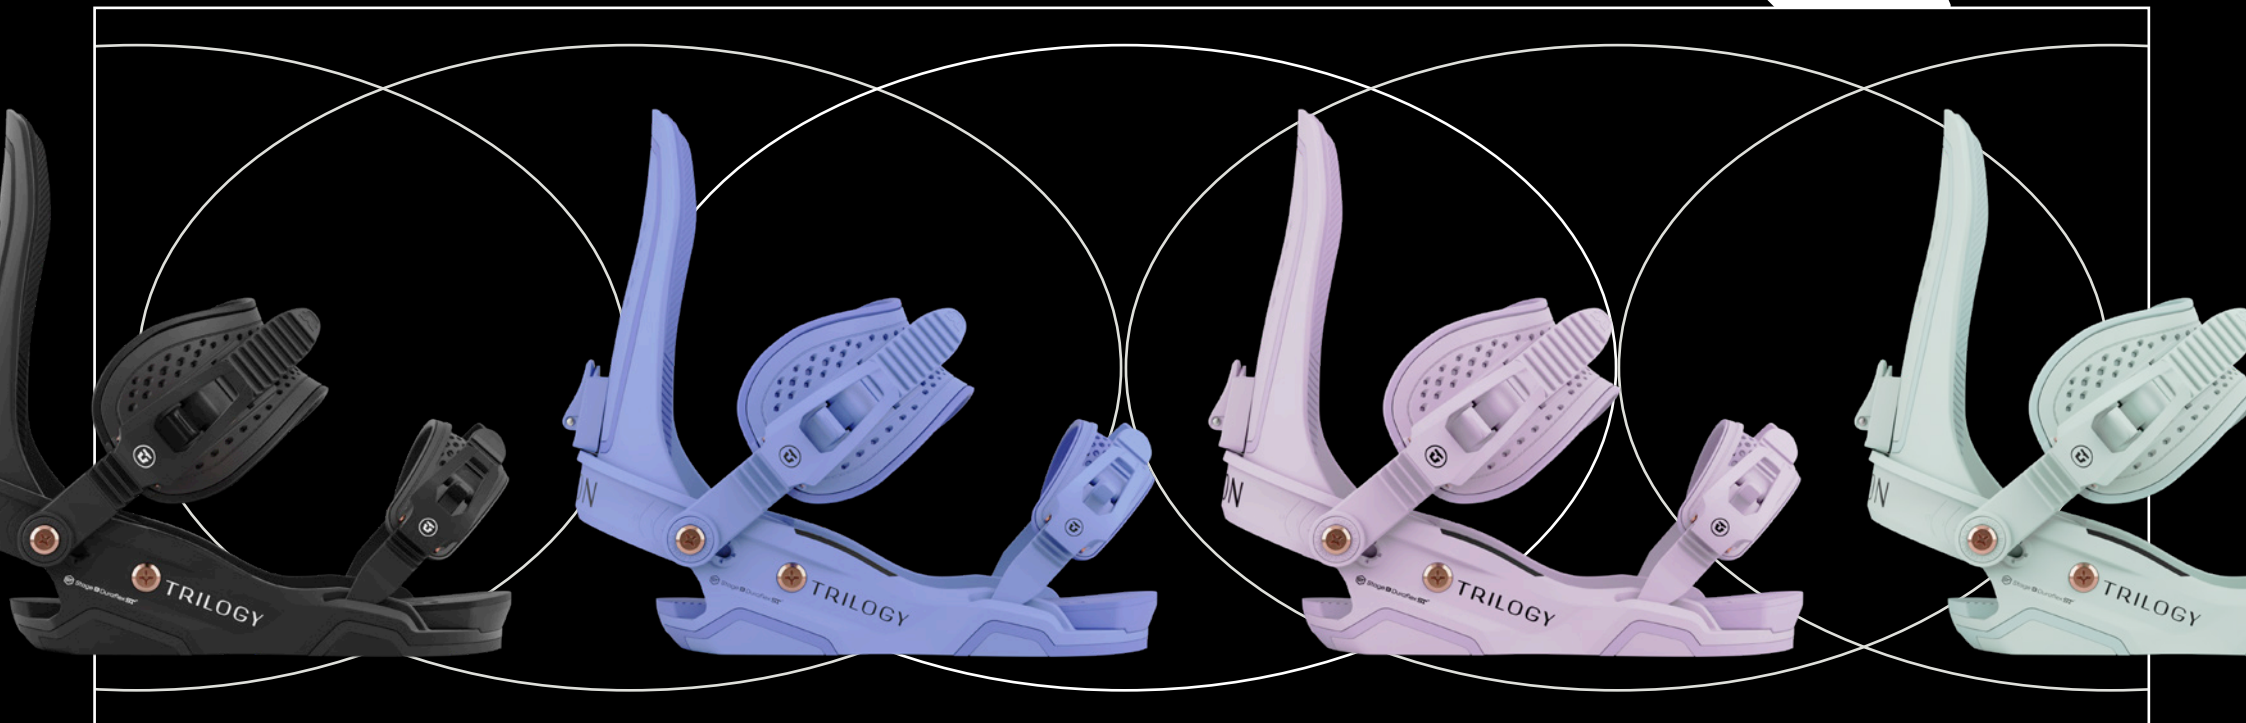

### PRODUCT FIRST MENTALITY

As always, we have a product first mentality at Union. Our goal is to get as many people as possible riding the new Force this season. From our professional snowboard team to the local shop employee, we want everyone to be able to ride the new Force and feel the difference first hand.

# ULTRA REACTIVE DAMPENING

\*UNION'S FASTEST GROWING FREESTYLE MODEL

Every component of the Ultra acts as a suspension system for your boots, loading and unloading with each movement as you snowboard. Strap in to feel the difference.

## BASEPLATE BUSHING

↓  
The Ultra's Molecular baseplate bushing provides the most cushioned and shock absorbing ride feel on the market today. 15% lighter than Union's Fused Vaporite bushing and guaranteed to minimize foot, ankle and knee fatigue. This is the future of freestyle binding design.

## ANKLESTRAP PADDING

↓  
The Forma X ankle strap's construction combines our responsive Exoframe exterior with the padded comfort and flexibility of the Forma interior. Form fits perfectly to any boot and helps to reduce hot spots on snowboard boots.

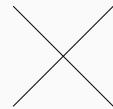

## HIGHBACK BUSHING

↓  
Union's molecular highback bushing provides increased freestyle flex and rebound while riding. This unique highback construction is exclusive to Union Binding Company.

TECHNOLOGY  
OVERVIEW:

TECHNOLOGY  
OVERVIEW:

→ EXP3 Forged Carbon Highback

If light and stiff is what you're after, look no further. The EXP3 Forged Carbon highback is 40% lighter than our standard EXP3 Duraflex highback and extremely responsive edge to edge. Made in Italy.

Featured On: Charger FC

→ EXP4 Highback

Designed for longer tours and bigger backcountry lines. The EXP4 highback features 15% more fiberglass than our standard EXP3 Duraflex highback. This stiffer new asymmetrical highback shape offers more support on long traverses and quicker edge to edge power for the ride down.

Featured On: Charger Pro

→ Exoframe 4.0 Slim Ankle Strap

25% lighter than our standard Exoframe 4.0 Ankle Strap and still just as comfortable. The new Exoframe 4.0 Slim Ankle Strap features a smaller ratchet, smaller ladder and a new streamlined ankle strap design to help reduce materials and weight as much as possible.

Featured On: Charger FC

→ Forged Carbon Heelcup

Lightweight, responsive, and made in Italy. Union's Forged Carbon heelcups are 45% lighter than our standard Extruded Aluminum heelcups and still just as bombproof. Backed by Union's lifetime warranty guarantee.

Featured On: Charger FC, Charger Pro
